Iron/Rust Satin (IRS)

## Color Code and Ordering Information

The color chart above shows the 12 available colors/finishes and their proper color codes that are available from Creative Metal Tile. Please note that every aging process and/or metal finish does not look good in every finish.

**Available Metal Colors:** Bronze (BZ), Copper (CO), Nickel/Silver (NS), Iron/Rust (IR)\*

**Metal Aging Process:** Natural, Antique (A), Verde (V), Rainbow (RB), Blacksmith Iron (BSI) and Aged Iron (AI)

**Available Metal Finishes:** Satin (S)

To determine the entry code when you order Creative Metal tiles, please note the item number first followed by metal color code (BR, BZ, CO, NS or IR), then aging process code (A or V) followed by the finish code (S).

**Example:** If you want to order tile ZZ 623 (shown in the chart above) in the Bronze Verde color with the Satin finish. Your order entry code would read "ZZ 623-BZVS".

There are five new finishes available. They are Rainbow Copper (RBCO), Rainbow Bronze (RBBZ), Blacksmith Iron (BSIS), Aged Iron (AIS) and Iron Rust Verde (IRVS). These five new metals, along with all verde finishes, have a 5% surcharge added to the price.

## Terms and Conditions

Always check for stock if delivery times are important. All Shipping is F.O.B. at our factory warehouse. All shipping charges are added to invoice or, if stated on your purchase order, billed to your shipping account.

\*Iron/Rust color can be used in damp areas. It should not be used in wet areas or where grease can spatter on the tiles.
