

Our Only Limitation Is Your Imagination

Made From Premium Metals

We have developed a proprietary process of creating decorative tiles from premium metals. Our in-house design and production capabilities allow us to offer products for commercial and residential applications, as well as private label lines.

Tradition Meets Technology

Utilizing 3-D CAD/CAM and CNC routing equipment and calling upon our designers' artistic talents, we combine the traditions of handcrafted metal work with advanced technology. From intricately carved flowers and vines to bold geometric designs, each tile is a work of art.

The Natural Beauty of Metal Tiles

Our tiles lend a touch of elegance to any project. We offer 12 distinct finishes, which include our five new options. Our tiles are stunning when used to create custom backsplashes, fireplace surrounds and bathrooms including showers*.

Custom Architectural Elements

Creative Metal Tile uses a propriety veneer process that allows us to produce virtually any metal creation, from small decorative elements to large panels, doors and columns. Using our state of the art technology, we take your idea and translate it into a beautiful reality.
